

BLESSED RAJ P

Front-End Developer

Villupuram, India | blessedrajp@gmail.com | Mob- 7305741744 | [Website](#) | [LinkedIn](#)

SUMMARY

Versatile and driven front-end developer with a passion for solving complex challenges and mastering new technologies. Known for adaptability, strong problem-solving skills, and a commitment to continuous learning. Eager to contribute to innovative projects and dynamic environments.

SKILLS

React | **Next.js** | **Typescript** | **Redux** | **Material-UI** | **Agile Development** | **Git**

EXPERIENCE

React Developer

May 2024 - Present

Hemas Enterprises Private Limited

- Hands-on experience in UI development, working on high-impact projects that enhanced user experience and application performance
- Collaborated with UX designers to create responsive, user-friendly interfaces, ensuring responsiveness and accessibility.
- Integrated APIs and managed complex data structures in scalable web applications, showcasing strong problem-solving skills.
- Adept at debugging and optimizing web applications for better performance, ensuring a smooth user experience. Worked in both Agile and Waterfall methodologies, adapting to iterative development processes and delivering projects on time.

UI Developer Intern

Nov 2023 – Mar 2024

Arkashya Tech Solutions

- Gained hands-on experience transforming UI designs into responsive websites, ensuring precision and usability. Developed strong problem-solving skills, debugging and optimizing web applications for better performance.
- Quickly adapted to the fast-paced environment, mastering the nuances of UI development while contributing to product-based projects.

PROJECTS

- **PMT (Project Management Toolkit)** – Built features for project breakdown into modules, milestones, tasks, and sub-tasks. Enabled task assignments and user tracking similar to Jira.
- **LMS (Learning Management System)** – Developed and managed the admin dashboard for content creation, assignment, and learner management. **Optimized API integration services**, improving data fetching efficiency and performance. Implemented **custom hooks**, reducing redundant logic and improving **code modularity and reusability**. Achieved proper state management using Redux
- **NERAM- NERAM (Timesheet Application)** – Integrated with PMT for task-based timesheet filling. Designed task selection workflows for efficient time tracking. Implemented **dynamic components handled by props**, reducing code complexity and **decreasing total lines of code by 60%**

EDUCATION

BE -ECE | IFET college of Engineering | Aug 2019 – May 2023 |
